Senior R Developer / Data Scientist

[Civey](#)

📍 Berlin, DE

- Developed software to perform statistical analysis of survey data from millions of users using R, Python, SQL and Bash.
- Coordinated the performance monitoring of our software products, including reporting and addressing troubleshooting requests from other teams.
- Configured and troubleshooted other team's systems (Linux and MacOS) to use our software products.
- Created and extended company-wide documentation on my team's statistical and software products.
- Trained new team members by using documentation, learning sessions, joint code reviews and pair-programming.
